

PRECONFERENCE WORKSHOPS

1-2 December 2017

7th International Patient Safety Conference 2017

Mumbai, India

Appreciate your interest in 7th IPSC's Pre-Conference Workshops

The International Patient Safety Conference (IPSC), now in its seventh year, is an annual event to learn from the patient safety experts across the world. It has become a powerful platform where best practices and innovations in patient safety are shared.

Besides mainstream presentations, panel discussions, debates, paper presentations and other well-knit sessions; desirous delegates would also get an opportunity to attend exclusively and expertly crafted half-day long *Pre-Conference Workshops* on a day prior to the main conference. This will provide the participants with hands-on practical learning from patient safety experts in various domains.

In line with the theme of 7th IPSC, following workshops are planned this year:

- DESIGN A RIGHT FACILITY
- DESIGN THE RIGHT INFECTION CONTROL PROGRAM
- RISK MANAGEMENT IN HOSPITALS
- CLINICAL AUDITS
- BEGIN YOUR ACCREDITATION JOURNEY: DRAFTING POLICIES & DESIGNING QUALITY PLAN

Don't miss the chance to meet, interact and learn directly from patient safety experts at a very nominal fee. Please visit **REGISTER NOW** for registration. Limited seats available. First Come First Served.

We are happy to extend our gratitude to all participants of Pre-Conference Workshops by consenting a discounted registration to 7th IPSC. Please visit **REGISTER NOW** for joint registration.
